CONNECTION PERFECTION

2m C20 Plug to Locking C19 Extension Cable
No.: 30131

Description
- IEC C20 Plug to Locking C19 Socket
- IEC extension cable that safeguards against accidental disconnection
- Built-in release button permits the cable to be easily removed when required
- Can be used as power extension or computer/monitor/UPS power connection lead
- 10 Year Warranty

This unique locking IEC C20 extension cable is ideal for protecting electrical equipment from accidental disconnection. The IEC receptacle locks upon insertion into a device and can't easily be removed without operating the built-in release button. Ideal for safeguarding valuable computers, medical equipment, display devices or any other equipment exposed to the general public and / or protecting appliances that are vulnerable to vibration.
Please note the built-in release button must be pressed when inserting the connector as well as removal to avoid earth pin damage.
