

USB 3.1 Type C Hub 3 Ports w/ Power Delivery

No.: 43090

Description

This product has been discontinued and replaced by Part No [43092](#).

- Connect 3 Type A USB 3.1/3.0 Peripherals to a Type C Port
- Supports SuperSpeed data rates of up to 5Gbps
- Compatible with Thunderbolt 3
- Features a USB Type C Female port for Power Delivery input up to 60W (20V 3A)
- Compatible with all USB Type C equipped computers
- 2 Year Warranty

This USB 3.1 Hub with Power Delivery provides 3 USB Type A SuperSpeed ports for connecting USB peripherals to a Chromebook Pixel 2, MacBook or other USB Type C equipped notebook.

For added convenience the Hub also features a Type C Power Delivery Port which enables the connection of a power supply so that the notebook can be charged/powerd via it's Type C port at the same time as operating the connected peripherals.

Installation is simple as no drivers are required and the Type-C's reversible design means that you do not have to pay attention to which way the cable is inserted into the port.

Please note:

Any interruption of the power supply will cause the USB bus to reset. This is a technical limitation of USB PD 2.0.
