

Stereo Audio Extender, Cat.5/6 100m 3.5mm

No.: 70450

Description

- Extends analogue audio signals by up to 100m
- Uses low cost CAT5/6 UTP Cable - Not included
- 3.5mm Male to RJ45 Female (each unit)
- Gold plated connectors
- 2 Year Warranty

This device can transmit Stereo L + R audio signals over CAT5e or higher twisted pair cable up to a maximum distance of 100m. Its compact design and easy installation make it ideal for corporate, education and home cinema use or any other situation requiring audio distribution.

Use our CAT5e/6 cable or UTP CAT5e Solid Core cables which are sold separately.

*Note: maximum transmission lengths are for guidance and will depend on your application and the type of twisted pair cable used. This product is designed for use with a single network cable between the transmitter and the receiver.
